

ABOUT THE PROJECT

The VRGreen Adventure project aims at fostering pro-environmental behaviors to students from an early age through the use of Virtual, Augmented Reality and Serious games.

We proudly present the VRGreenAdv Green Guidance & Career Education Guide which was tested in May and June within schools in our different contexts.

The **VRGreenAdv Green Guidance & Career Education Guide** is digital handbook featuring informative representations of green career prospects, using edge VR/360° videos bringing an air of innovation in career information.

The Guide includes 18 green occupational profiles – that present “A Day in the Life of...”

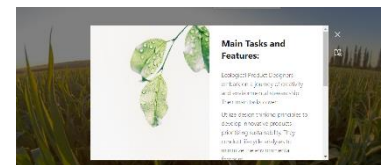

The elaboration of the guide is the culmination of:

- **A survey of more than 60 companies**
- **Selection and elaboration of the 18 job profiles**
- **Interviews with more than 14 professionals within these occupations**
- **Creation of the 18 360° videos**
- **Creation of VR stations in our partner schools to explore the material**
- **Testing in schools with 200 students and more than 20 teachers**

Each 360º video presents:

- **A Day in the Life:** a brief description of the occupational profile.
- **Main tasks:** the main responsibilities and tasks.
- **Challenges:** aspects that can be difficult in their day to day work.
- **Tools:** the equipment and tools they use each day.
- **School subjects:** the subjects they studied at school that are most important in their work.
- **Skills:** the skills they use in their day-to-day activities.
- **Education:** the education and training pathways to the occupation profile.

The Guide was tested among students and teachers, who are the main target groups for the guide. The pilot within schools has given us feedback in order to make improvements and changes before the final release. The guide will be available in Portuguese, Spanish, Catalan and Greek.

With the VRGreenAdv Green Guidance & Career Education Guide, we are **Empowering Kids for a Greener Future!**
